

LOCKSMITHS & SECURITY

CAPABILITY STATEMENT

2025

Company Overview

We provide fully integrated locksmithing, electronic security, and hardware services—delivering seamless coordination and reliable results without subcontractor delays.

DCL Locksmiths & Security is a proudly Aboriginal-owned company delivering integrated locksmithing, electronic security and architectural hardware services across New South Wales and the Australian Capital Territory, with capacity to provide services across Australia. Established in 1979 and under Indigenous ownership for over 20 years, DCL has become a trusted partner to government, commercial, health and infrastructure sectors.

With a team of highly qualified professionals and SCEC Approved Locksmiths, DCL offers full-scope, in-house solutions that streamline procurement, minimise scope gaps and enable rapid, coordinated delivery. From fast-tracked workers camps to complex government fit-outs and large-scale hardware supply, we are known for reliability, flexibility and performance under pressure.

Clients trust DCL to deliver where others hesitate, across remote locations, secure environments and multi-disciplinary challenges. We don't just show up. We get the job done right.

Acknowledgement of Country

DCL Locksmiths & Security acknowledges the Traditional Custodians of the lands on which we live and work, including the Waramungu, Wiradjuri and Ngannawal peoples. We pay our respects to Elders past and present and extend that respect to all Aboriginal and Torres Strait Islander peoples. As a proud Aboriginal-owned business, we honour the deep cultural and spiritual connection First Nations people have to Country.

Our Purpose

Our team thrives in remote, high-security, and fast-paced environments, earning repeat work from federal agencies and infrastructure clients across Australia.

Our Vision

To be Australia's most trusted provider of integrated security and hardware solutions, recognised for our Indigenous leadership, professionalism and unwavering commitment to quality, service and community impact.

Our Mission

To simplify complex projects through fully integrated, in-house delivery of locksmithing, electronic security, and architectural hardware solutions. We eliminate scope gaps, delays, and miscommunication by operating as one coordinated team, ensuring speed, accuracy, and accountability. With proven expertise and adaptability, we help clients succeed in high-security, remote, and fast-paced environments, without compromising quality or compliance.

Our Values

- **Dependability:** We're known for showing up when others won't. Our clients trust us to deliver quality work, even in the most remote or secure locations.
- **Community:** We honour our roots and invest in the future, creating meaningful opportunities for Indigenous people while supporting the communities we live and work in.
- **Leadership:** As a majority Indigenous-owned business, we lead with integrity, accountability, and purpose, creating impact for our clients and community alike.

Established in 1979 and proudly Indigenous-owned since 2003, DCL brings decades of trusted experience to every project, large or small.

Our Services: Locksmithing

DCL delivers end-to-end locksmithing services, including the design, supply, installation and maintenance of mechanical and electronic lock systems. With certified Master Locksmiths and SCEC Approved Locksmiths, we operate confidently in high-security government and commercial settings.

Secure, Compliant and Built to Last.

Master key systems & high-security locks

We design and implement tailored restricted master key systems to support secure access across complex facilities. These solutions are ideal for government departments, critical infrastructure, mining, healthcare providers and education settings. All systems are installed by licensed professionals and built to meet the highest security standards

Maintenance, Emergency Access & Remote Delivery

DCL offers ongoing servicing, lock rekeying, and fast-response support for access emergencies. Our teams are experienced in delivering remote and regional projects, including worker accommodation camps and rural infrastructure. Our ability to mobilise quickly and perform in remote environments sets us apart.

Our Services: Electronic Security

DCL delivers tailored electronic security solutions that integrate seamlessly with your site infrastructure. From standalone alarm systems to advanced CCTV and access control, we provide the technology, installation and ongoing support to keep people and assets secure.

Integrated Safety and Smart Control.

Access Control, Alarms & Surveillance

We design and install modern access control systems, both wired and wireless, for commercial, government and industrial sites. Solutions include biometric readers, card and fob access, duress alarms, and full CCTV surveillance. For added protection, we offer 24/7 monitored alarm systems backed by responsive support.

System Integration for Complex Sites

Our team excels at integrating security systems within existing facilities, with minimal disruption. Whether linking to automated doors, interlocks, or turnstiles, we deliver discreet, high-performance installations. DCL is trusted for secure and logistically complex sites, particularly in regional and remote locations.

Our Services: Project Hardware

DCL supplies high-quality architectural door and security hardware for major construction and refurbishment projects. We manage full scheduling, packaging, and delivery, working closely with builders, contractors, and procurement teams to streamline supply.

Safety, Security and Access.

End-to-End Hardware Supply & Scheduling

We source and deliver a complete range of door and security hardware, including locks, cylinders, hinges, closers, seals and FF&E. Our dedicated scheduling team sequences and packages each delivery to match construction timelines, reducing delays, confusion and onsite handling. Clients include hospitals, schools and commercial developments.

Procurement Advantage with Indigenous Certification

DCL is Australia's only Supply Nation Certified business delivering this full spectrum of hardware services. By consolidating hardware, locksmithing, and electronic security with one trusted provider, project teams can meet Indigenous procurement goals without compromising capability, speed, or technical accuracy.

Our Services: SCEC Approved Locksmithing Services

Our locksmiths are approved under the Security Construction and Equipment Committee (SCEC) locksmith scheme, enabling us to operate within some of Australia's most secure government and defence environments. Our team includes SCEC Approved Locksmiths with AGSVA Baseline, NV1, and NV2 security clearances, allowing us to meet strict requirements for integrity, confidentiality, and technical compliance.

We work closely with federal and state government clients to support secure infrastructure, fit-outs, and facility upgrades, particularly where Type 1/1A alarm systems, PSPF compliance, and Defence security protocols apply.

SCEC Approved Locksmithing

DCL's Approved Locksmiths are authorised to install, service, and maintain mechanical and digital locks on SEEPL listed containers, and to work within PSPF Security Zones 4 and 5. We are trusted to operate in sensitive environments and routinely deliver lock installations and upgrades in classified settings, with all personnel assessed as fit and proper under SCEC guidelines.

Government-Ready and Clearance-Qualified

Our technicians are security-cleared through AGSVA to Baseline, NV1, and NV2 levels, ensuring suitability for classified environments. DCL supports end-to-end secure installations, including the integration of SCEC-compliant hardware and coordination with Security Zone Consultants where required under government policy. We understand the protocols and pressures of secure work and deliver accordingly.

Our Services: Access Control Solutions for Education and Hospitality

Flexible, scalable and built for remote environments.

DCL provides modern, wire-free access control systems tailored for workforce accommodation, hospitality, and multi-occupancy sites. These solutions enhance site security, streamline operations, and create a safer, more efficient experience for residents, guests, and facility managers, without the complexity or cost of traditional cabling.

Ideal for remote camps, hotels, aged care, and shared living environments, our systems combine convenience, scalability, and real-time control with durable, high-compliance technology.

Education – Smart Access Built for Learning Environments

Our wire-free smart access systems give schools and universities full control over who can go where, and when — using fobs, wristbands, cards, or mobile phones. Whether it's a single building or a multi-campus environment, credentials are managed in real-time or offline via Salto's SVN technology. The system integrates easily with student ID, print release, and attendance systems to streamline daily operations while enhancing security and duty of care.

- Flexible installs during school holidays, no rewiring required
- Integrates with print, ID, payment, and locker systems
- Lockdown and live alerts for emergencies
- Supports staged deployment and future expansion

Hospitality and FIFO Workers – Grade Access with Centralised Control

DCL's wire-free access control solutions enhance both guest experience and operational efficiency in worker camps, hotels, aged care, and multi-occupancy housing. Powered by Salto's JustIN Mobile and SVN-Flex platforms, our systems support remote check-in, central credential management and integration with CCTV, HVAC and emergency systems, all without the infrastructure burden of wired installs.

- Supports mobile and contactless room access for guests and workers
- Ideal for mining camps, resorts, aged care, and co-living facilities
- Reduces physical key handling, lost-key costs, and manual access issues
- Enables audit trails, room scheduling, meal zone access, and remote overrides

Industries We Serve

DCL supports a wide range of industries that demand secure, compliant, and fast-turnaround solutions. We understand the pressures of working in live, remote, and high-security environments and we've built our business to meet those challenges with speed, precision and reliability.

- Federal Government
- State Government
- Defence
- Education
- Healthcare
- Hospitality & worker accommodation
- Construction
- Mining
- Critical Infrastructure
- Remote and regional infrastructure

- Supply Nation Certified
Proudly majority Aboriginal owned, managed, and operated.
- Security industry master licences
NSW Master Licence: 408636117
ACT Master Licence: 17502639

Case Study : Department of Home Affairs – Docklands Office Relocation

The Challenge

DoHA required a complete security hardware and key system installation across an 8-level, 24500 sqm site while works were still underway and specifications evolving.

Our Approach

DCL supplied and installed BiLock Exclusive SL3-rated key systems, electronic locks, and over 250 security doors. The team coordinated closely with builders, consultants, and agency stakeholders.

Installation included over 200 electric mortice locks and electric strikes, high-security monitoring devices, and both dual and single-lock door handles.

The Result

Despite scope changes and time pressures, DCL delivered a defect-free, staged installation with over 1000+ cylinders and 300+ keys issued, earning commendation for planning and adaptability.

Case Study : NSW Rural Fire Service Training Academy – Dubbo, NSW

The Challenge

As part of a new training facility at Dubbo Airport, the NSW RFS needed a complete door hardware and electronic security solution. The site was a design and construct project, meaning specifications were not fully developed at the outset.

Our Approach

DCL developed the door hardware schedule and selected products that suited the site's functional and aesthetic needs. We supplied and installed Lockwood hardware, Integriti access control, Milestone CCTV, and VingCard accommodation locks.

The Result

DCL delivered a cohesive, integrated system that allowed for intuitive control and monitoring of site activity. The hardware complemented the architecture while delivering security and durability.
